# Journal's Performance

## Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)

2024 JOURNAL IMPACT FACTOR	2024 JOURNAL IMPACT FACTOR WITHOUT SELF CITATIONS
0.4	0.3

### Journal Impact Factor Trend 2024

Journal Impact Factor is calculated using the following metrics

Citations in 2024 to items published in 2022 (5) + 2023 (13)		18		
<hr/>				
Number of citable items in 2022 (16) + 2023 (25)	=	41	=	0.4

Journal Impact Factor without self cites is calculated using the following metrics

Citations in 2024 to items published in 2022 (5) + 2023 (13) - Self Citations in 2024 to items published in 2022 (1) + 2023 (4)		18 - 5		
<hr/>				
Number of citable items in 2022 (16) + 2023 (25)	=	41	=	0.3

## Journal Impact Factor Contributing Items

### Citable Items (41)

TITLE	CITATION COUNT
Analyzing and Developing Strategies for the Ecological Restoration of Urban Rivers Aligned with the Ecological Urbanism Framework Authors: Haeri, Sanaz;Masnavi, Mohammad Reza Volume: 15 Accession number: WOS:000976505400006 Document Type: Article	2
The Role of the Water System in the Eternity of the Persian Garden Authors: Yarahmadi, Samaneh;Ansari, Mojtaba;Mahdavinejad, Mohammadjavad Volume: 14 Accession number: WOS:000907140200002 Document Type: Article	2
A Comparison and Evaluation of the Basics of Relationship Between Human and Nature in Two Bodies of Landscape and Ecology Knowledge Authors: Sabokro, Delaram;Hemmati, Morteza;Motedayen, Heshmatollah Volume: 14 Accession number: WOS:000876169800004 Document Type: Article	1
An Analysis of the Position of Historical Passages in the Structure of Public Urban Spaces (Case Study: Dar-Khoungah Passage, Tehran) Authors: Abedini, Hamed;Ayvazian, Simon Volume: 14 Accession number: WOS:000838230000007 Document Type: Article	1
An Investigation of Developments and Changes in Mashhad Spatial Organization Authors: Nattagh, Mohammad Javad;Hosseinzadeh, Mahdi Volume: 15 Accession number: WOS:001039683900003 Document Type: Article	1

# Journal Citation Indicator (JCI)

## 0.67

The Journal Citation Indicator (JCI) is the average Category Normalized Citation Impact (CNCI) of citable items (articles & reviews) published by a journal over a recent three year period. The average JCI in a category is 1. Journals with a JCI of 1.5 have 50% more citation impact than the average in that category. It may be used alongside other metrics to help you evaluate journals. [Learn more](#)

# Total Citations

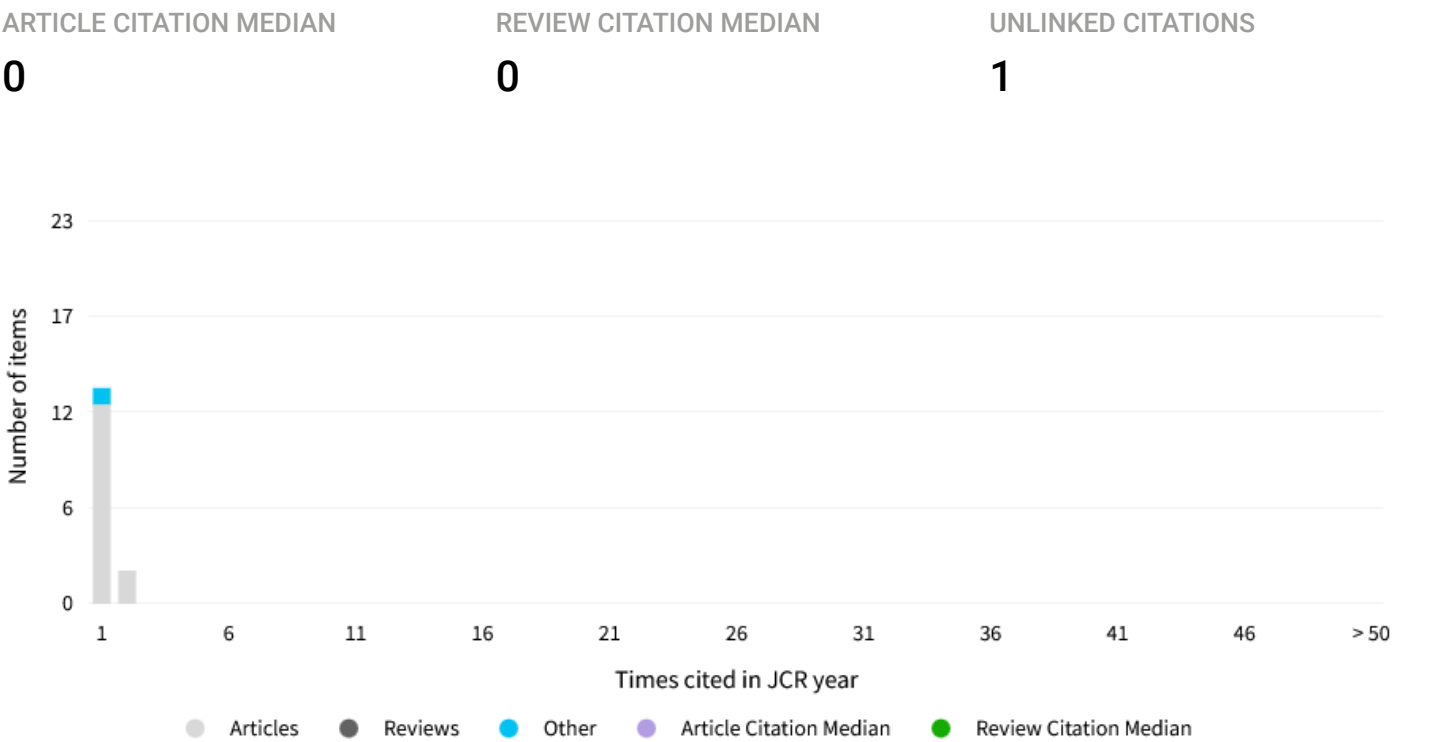

## 105

The total number of times that a journal has been cited by all journals included in the database in the JCR year. Citations to journals listed in JCR are compiled annually from the JCR years combined database, regardless of which JCR edition lists the journal.

# Citation Distribution

The Citation Distribution shows the frequency with which items published in the year or two years prior were cited in the JCR data year (i.e., the component of the calculation of the JIF). The graph has similar functionality as the JIF Trend graph, including hover-over data descriptions for each data point, and an interactive legend where each data element's legend can be used as a toggle. You can view Articles, Reviews, or Non-Citable (other) items to the JIF numerator. [Learn more](#)

## 0 times cited

# Rank by Journal Impact factor

**Note:** While journals indexed in AHCI and ESCI receive a JIF from the 2022 release in June 2023 onward, journals in the 25 arts & humanities categories will not receive ranks, quartiles, or percentiles.[Learn more](#)

## Rank by Journal Citation Indicator (JCI)

Journals within a category are sorted in descending order by Journal Citation Indicator (JCI) resulting in the Category Ranking below. A separate rank is shown for each category in which the journal is listed in JCR. Data for the most recent year is presented at the top of the list, with other years shown in reverse chronological order.[Learn more](#)

# Citation network

## Cited Half-life

5.1 years

The Cited Half-Life is the median age of the items in this journal that were cited in the JCR year. Half of a journal's cited items were published more recently than the cited half-life.

# Additional metrics

## Eigenfactor score

0.00007

The Eigenfactor Score is a reflection of the density of the network of citations around the journal using 5 years of cited content as cited by the Current Year. It considers both the number of citations and the source of those citations, so that highly cited sources will influence the network more than less cited sources. The Eigenfactor calculation does not include journal self-citations. [Learn more](#)

## Normalized Eigenfactor

0.01639

The Normalized Eigenfactor Score is the Eigenfactor score normalized, by rescaling the total number of journals in the JCR each year, so that the average journal has a score of 1. Journals can then be compared and influence measured by their score relative to 1. [Learn more](#)

# Article influence score

0.079

The Article Influence Score normalizes the Eigenfactor Score according to the cumulative size of the cited journal across the prior five years. The mean Article Influence Score for each article is 1.00. A score greater than 1.00 indicates that each article in the journal has above-average influence. [Learn more](#)

# 5 year Impact Factor

## 0.5

The 5-year Impact Factor is the average number of times articles from the journal published in the past five years have been cited in the JCR year. It is calculated by dividing the number of citations in the JCR year by the total number of articles published in the five previous years.

5 year Impact Factor calculation

Citations in 2024 to items published in [2019-2023] (55)			
<hr/>	=	$\frac{55}{118}$	= 0.5
Number of citable items in [2019-2023] (118)			

# Immediacy Index

<0.1

The Immediacy Index is the count of citations in the current year to the journal that reference content in this same year. Journals that have a consistently high Immediacy Index attract citations rapidly.
